

**Valerii Nikolenko**

*(Biopower operator)*

## **Report**

**“Circles on the wheat field near-by the village Zeperov  
Lviv Ukraine “**

(On results the expedition of SRCAA "Zond" on June, 30, 2013.  
An addition to the fundamental analysis)

**Kiiv, 2013**

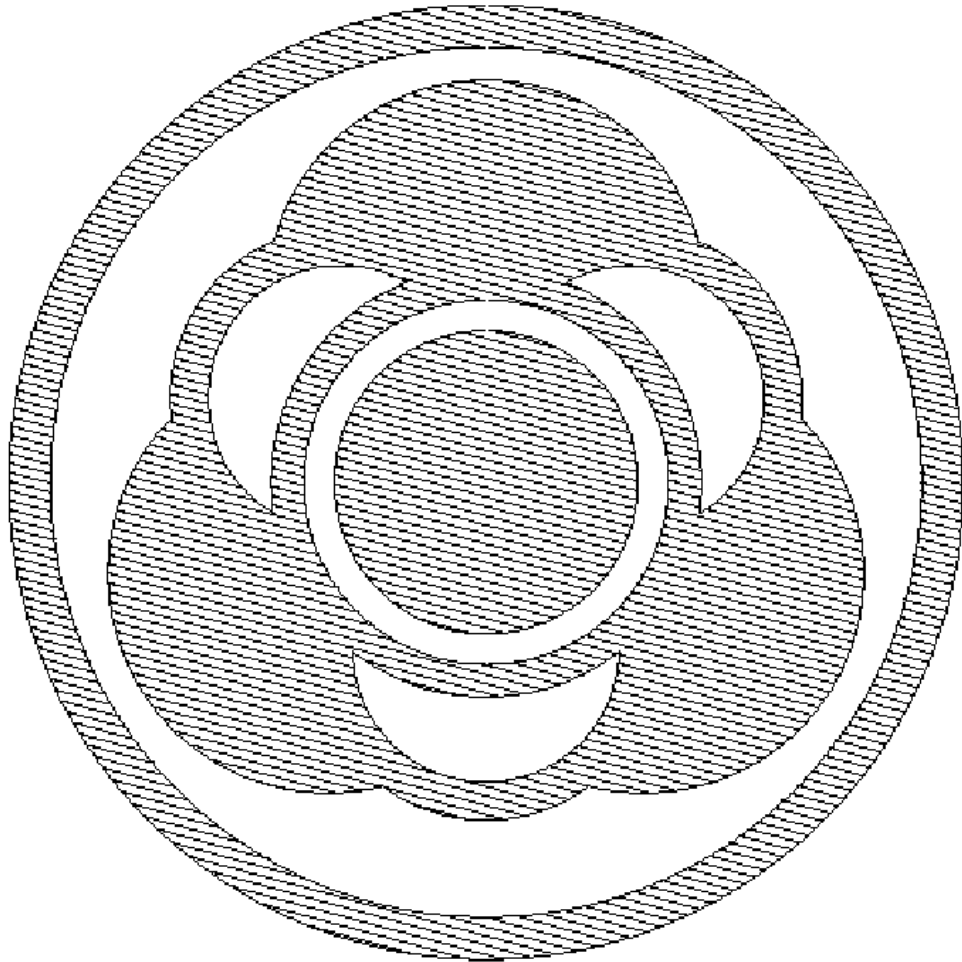

*Photo 1. View of circles from a route Rivne-Lviv*

*Photo 2. Tracks alongside the circles.*

*Схема бізерункі*

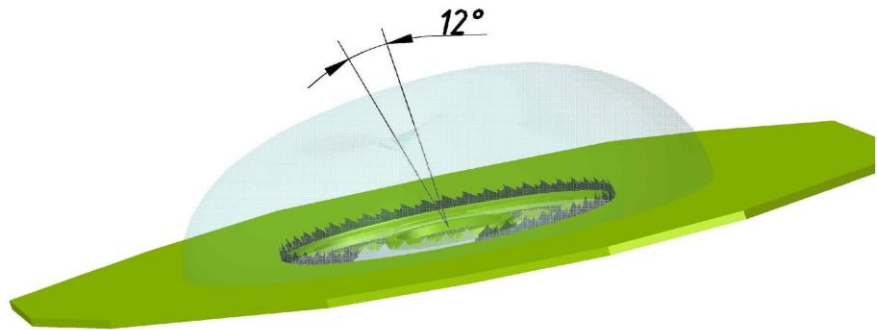

-  *Невіснені колірски півнялі*
-  *Звичайні колірски півнялі*

*Picture 1. Chart of patterns.*

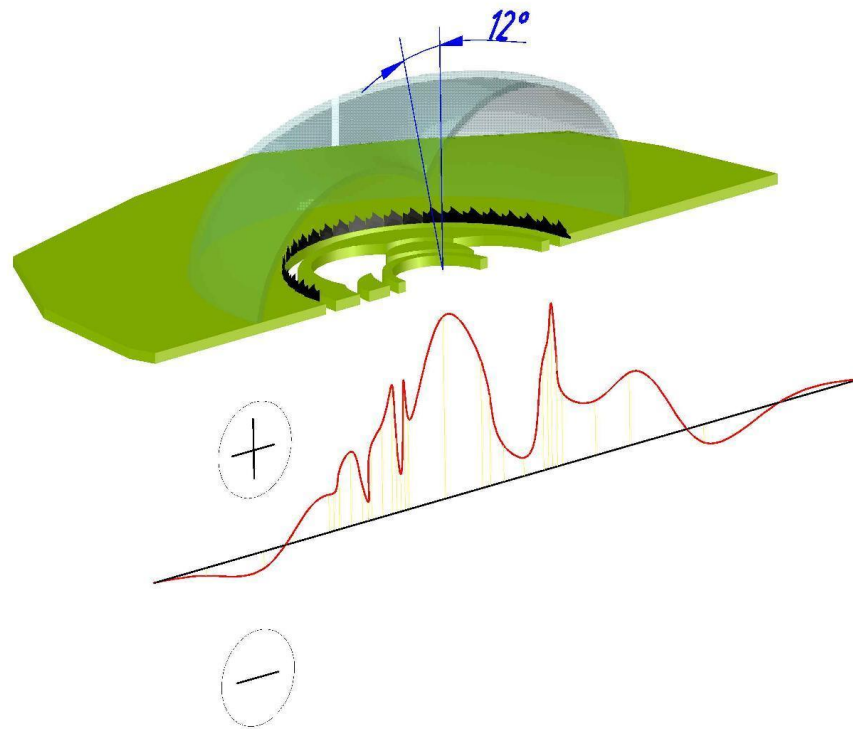

*Picture 2. 3D model of patterns*

*Picture 3. Biopower formations around patterns*

Transparent "dome" like torus around patterns and a white "flame" on the external circle of patterns. The vertical axis of "dome" is displaced from vertical on 12° approximately.

*Picture 4. Intensities of biofield at a vertical section.*

Maximal value of intensity +100 in a center, a minimum value is -10 (relative units) on the line of crossing of “dome” and a horizontal surface.

**Conclusions:**

1. The presence of a deepening in the center of circle and rough edges of patterns can testify to application of a stick, ropes and a sheet for making patterns
2. The chart of intensity and distribution of streams of biofield along the diameter of circle can not be explained by human activity.
