Mysterious UFO Appears Over Belarusian Cities

It was spotted in Brest, Vorsha, Hrodna and other areas of the country.

On the night from July 9 to 10, photos and videos of a shining object of unusual shape began to appear in social networks. It was spotted over Brest, Vorsha, Hrodna and other areas of Belarus.

"UFO?" wondered the Belarusians. No, just another step of mankind into space.

The object seen in the sky is a European heavy rocket Ariane 6 of the European consortium of Arianespace, which was successfully launched from the Kourou launch site in French Guiana at 22.00 Minsk time on July 9.

Кто знает, что это такое?

задаются вопросом 🤔

The rocket made at least three turns around the Earth, Belarusians, judging by the time, could observe the fly-by of the second turn.
