

# Two Pendleton Residents Tell Of Mystery Discs

PENDLETON, Ore., June 30 (AP)—Mysterious objects, flying high and fast, were reported today by two Pendleton area residents.

Mrs. Morton Elder, McKay Creek farm wife, reported seeing seven "perfectly round, umbrella-like" objects flying in a northwesterly direction about 11 a.m. Sunday.

She said the "planes" made a humming noise that resembled the sound of a musical top.

She said they were flying in a perfect wedge-shaped formation at

a "very fast" speed. She described them as "white as snow" and "round like a mushroom or an umbrella."

She said there was no sign of a tail on the objects. They were flying "very high."

At the same time, Bill Schuening, foreman of the Lester King ranch about 15 miles north of Pendleton, reported he saw objects similar to those reported near Mt. Rainier Wednesday by Kenneth Arnold, Boise, Ida., flying businessman.

Schuening said he saw "planes" the same day. Mr. Arnold reported seeing the so-called "flying discs" whizzing along the Cascade mountains at an estimated 1200 miles an hour.

The objects were so high, Schuening related, that he was unable to determine their shape but he said they were "weaving in and out of formation." He said they were traveling at "an unusual rate of speed."

Arnold reported the objects he saw also were weaving "like the tail of a Chinese kite."

## Congress In Fiscal Huddle

WASHINGTON, June 30 (AP)—Congressional fiscal experts went into a huddle today over ways of financing federal agencies as the fiscal year neared an end with only one of 12 regular appropriation bills cleared by both the senate and the
