

# UFOs have become unmeasurable beyond belief

Published  
July 24, 2020

On July 21, 2020, [ufosightingshotspot.blogspot.com](https://ufosightingshotspot.blogspot.com) posted a video filmed by a citizen watching the sun by the name of Linda Miller, in which a UFO was captured, as it were, of a completely ordinary look, but in an unusual place – near the Sun:

The video itself, where the object is shown in slow motion:

The video for July 17, and on the eve of July 12, Linda saw the following near the Sun:

Meanwhile, other earthlings do not look at the Sun, but on the sides, where no less interesting events take place.

Japan, UFOs dance in a circle:

Latin America, UFO sucks water from the ocean:

India – similar traces in the atmosphere are quite often observed over the Nevada desert, but India does not have hypersonic vehicles in service:

Panama is like an annular solar eclipse, but can the Moon close the Sun so quickly?

And this thing would not cause doubt to ny nibirologist observing the crescent of Nibiru, however, as the author of the video writes – before getting into the lens, the object rushed very quickly across the sky, which attracted attention:

In general, the “aliens” do not leave us and the only thing that is not clear is what are some of them getting prepared for? We are not optimistic about this.

Yesterday a video was posted on YouTube, which was sent to the author of the channel by a concerned citizen and asked him: what is it?

<https://youtu.be/-AaAc4ELc3Y>

Some connoisseurs began to tell the dark woman that it was “lightning”, that is, lightning without sound, but it was not lightning. We and many of our acquaintances have observed similar things this summer. Lightning struck directly overhead, but there was no thunder. People now see this all over the world, then post on social networks and also ask: “what is this?”.

We do not know what it is, but we know for sure that it never happened before. Therefore, it is obvious that soon there will be many other things that were not there before.
